On July 8 and 9, 2020, the Federal Energy Regulatory Commission convened a Commissioner-led technical conference to discuss the ongoing, serious impacts that the emergency conditions caused by COVID-19 are having on various segments of the United States' energy industry. During the conference, the Commission explored the potential longer-term impacts on the entities that it regulates in order to ensure the continued efficient functioning of energy markets, transmission of electricity, transportation of natural gas and oil, and reliable operation of energy infrastructure today and in the future, while also protecting consumers.
